

# Coding Symbols

## *Their Names*

| Symbols | Coding Name                                        |
|---------|----------------------------------------------------|
| ()      | Parentheses / Round Brackets                       |
| { }     | Curly Braces / Curly Brackets                      |
| [ ]     | Square Brackets                                    |
| < >     | Angle Brackets (also used as comparison operators) |
| ,       | Comma                                              |
| .       | Dot/Period                                         |
| :       | Colon                                              |
| ;       | Semicolon                                          |
| ' '     | Single Quote                                       |
| " "     | Double Quote                                       |
| +       | Plus / Addition Operator                           |
| -       | Minus / Subtraction Operator                       |
| *       | Asterisk / Multiplication Operator                 |
| /       | Slash / Division Operator / Forward Slash          |
| %       | Modulo                                             |
| =       | Assignment Operator                                |
| ==      | Equality Operator                                  |

# Coding Symbols

## *Their Names*

| Symbols | Coding Name                    |
|---------|--------------------------------|
| ===     | Strict Equality (JS)           |
| !=      | Not Equal                      |
| !==     | Strict Not Equal               |
| >       | Greater Than                   |
| <       | Less Than                      |
| >=      | Greater Than or Equal To       |
| <=      | Less Than or Equal To          |
| &&      | Logical AND                    |
| !       | Logical NOT / Exclamation Mark |
| &       | Bitwise AND / Ampersand        |
| ^       | Bitwise XOR / Caret            |
| ~       | Bitwise NOT / Tilde            |
| <<      | Left Shift                     |
| >>      | Right Shift                    |
| #       | Hash / Pound / Number Sign     |
| @       | At Symbol                      |
| &       | Dollar Sign                    |

# Coding Symbols

## *& Their Names*

| Symbols            | Coding Name                              |
|--------------------|------------------------------------------|
| <code>_</code>     | Underscore                               |
| <code>\</code>     | Backslash                                |
| <code>?</code>     | Question Mark                            |
| <code>-&gt;</code> | Arrow Operator (C, C++, PHP)             |
| <code>=&gt;</code> | Fat Arrow (JS, Lambda in many languages) |
| <code>...</code>   | Spread / Rest Operator or Ellipsis       |
| <code>/* */</code> | Block Comment                            |
| <code>//</code>    | Single-line Comment                      |
| <code>`</code>     | Backtick                                 |

Happy  
*Coding*
